The LYCRA Company

THERMOLITE® EcoMade

THERMOLITE® EcoMade Fiber

ENGINEERED FOR LIGHTWEIGHT WARMTH

Fabric made with THERMOLITE® EcoMade technology provides lightweight warmth for all activities. Constructed with functional, insulating hollow fibers that last, THERMOLITE® EcoMade technology can be used in apparel and non-apparel products. And, consumers can feel good about selecting garments engineered with this technology because the fiber is made with 100% recycled resources.

ATTRIBUTES	KEY BENEFITS
Engineered hollow fibers trap the heat	Keep wearer warm
Lightweight insulation fibers	Allow for lightweight, more flexible garments
Moves moisture away from the skin*	Keeps wearer dry and warm longer
Fiber made with 100% recycled resources	Reduced environmental impact

* THERMOLITE® All Season EcoMade technology

HOW IT'S DONE

Hollow core fibers trap air, provide insulation and wick moisture to the outside of the fabric where it can dry quickly*.

WHAT MAKES IT MORE SUSTAINABLE?

Plastic bottles are collected, cleaned, ground up into flakes, and made into chips, which are then spun into fiber and yarn, and finally, woven into your apparel. So you can have the same performance you've come to know from the THERMOLITE® brand, and help the environment. Good for the planet and good for business.

BRANDING

THERMOLITE® EcoMade

THERMOLITE® EcoMade

RECOMMENDED END USES

- Socks
- Fleece
- Insulation for jackets, sleeping bags, shoes, gloves & caps
- Base layers
- Denim, bottoms
- Ready-to-wear and outdoor shirting
- Ready-to-wear and sportswear tops
- Military, law enforcement, protective & workwear
