DON'T LEAVE CONSUMERS TO SWEAT IT OUT.

TRY THE ULTIMATE MULTI-TASKER.

Whether powering through a workout or presenting in the boardroom, visible sweat isn't just a distraction – it can lower confidence and self-esteem. In fact, it's the leading pain point among consumers*, leaving them to improvise. Consumers want one fabric that does it all. A fabric with the blend of cooling comfort they've come to expect combined with the sweat-masking performance they desire. That's why we've created new **COOLMAX CloakFX™ fiber.** This lightweight, durable fiber helps consumers feel cool while minimizing the appearance of sweat.

SEE THE DIFFERENCE

The optical masking engine in COOLMAX CloakFX™ fiber minimizes the visual impact of sweat.

*VML, The Modern Consumer Study, 2025

Be among the first to offer your customers the only fiber that helps promote confidence – with coolness, comfort and sweat-masking performance.

- Minimizes the visual appearance of sweat
- Helps you feel cool
- Keeps performing even after multiple washings
- Built mindfully

KEY GARMENT APPLICATIONS: Activewear, Ready-to-Wear, Workwear
