LYCRA® T400®

WHAT IS LYCRA® T400® FIBER?

LYCRA® T400® fiber is an all-in-one polyester-based fiber solution for performance fabrics. Also available as LYCRA® T400® EcoMade fiber, made partially with recycled PET and plant-based materials.

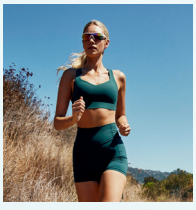

This exceptional bicomponent fiber improves a wide range of consumer problems: It's quick-drying, moisture-wicking, comfortable, and easy care. Plus, it's extremely durable, resisting damage and providing long-lasting performance benefits in soft, smooth fabrics that retain their shape for a lasting fit. It withstands industrial laundering, too, proving itself essential in the workwear segment.

HOW IT WORKS

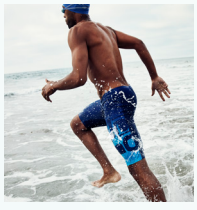

LYCRA® T400® fiber is not a spandex/elastane, but a different type of stretch fiber made from two different polymers. When exposed to heat, each polymer shrinks to a different degree, producing a smooth helical crimp. Because the crimp is permanent, it brings durable stretch and shape retention to activewear, athleisure, denim, ready-to-wear, socks, swimwear, and workwear.

KEY CONSUMER BENEFITS
FITS TODAY, FITS TOMORROW Stretches, recovers, and holds its shape no matter how you move
DURABLE Strong and abrasion-resistant, this fiber won't give up
EASY CARE Wash it, fold it, stuff it in your bag — it won't wrinkle or crease
MOISTURE MANAGEMENT Lightweight and breathable, this fiber wicks sweat away from the body to keep you cool

KEY GARMENT APPLICATIONS

CONSUMER BRANDING

By using LYCRA® T400® fiber, brands and retailers qualify for LYCRA XTRA LIFE® branding at the consumer level.

LYCRA XTRA LIFE® fiber hang tags can be ordered at no cost from the LYCRA ONE™ portal for certified finished garments.
